**Results of Palestinian Public Opinion Poll**  
**No. 51**  
**20-22 November 2015**

**Background**

In his last speech at the United Nations (UN), President Mahmoud Abbas asked Israel to shoulder its responsibilities as an occupying authority and noted that Palestinian people will not be committed to carrying out the signed agreements with Israel if Israel does not carry out the agreements it signed with the Palestinian Authority (PA).

In the last meeting of the PLO Central Council, the Council asked the PA to stop security cooperation with Israel and called upon Palestinians to boycott Israeli goods.

As a result to the repeated storming of Al-Aqsa Mosque by the Israeli settlers under the protection of the Israeli police and army, different reactions by Palestinian people ensued. Such reactions were termed as a temporary uprising by some while others saw that they are a third intifada.

After the signed agreement between Fateh and Hamas to end the Palestinian split, nothing was carried out of the agreement other than the formation of a Palestinian coalition government; the other items have not been implemented.

**The Results**

Following are the results of the Palestinian Public Opinion Poll no. 51 conducted by the Center for Opinion Polls and Survey Studies at An-Najah National University during the period from 20-22 November 2015. **The University sponsors all polls conducted by its Center.**

This poll undertakes the Palestinian public opinion in President Mahmoud Abbas' speech at the UN, the decision made by the PLO to stop security coordination with Israel, the reactions of the Palestinian people to the storming of Al-Aqsa Mosque, the boycott campaign of Israeli goods and products in addition to the political affiliations of Palestinian people.

The sample included 1363 persons whose age group is 18 and above and who have the right to vote. The enclosed questionnaire was distributed on 863 persons from the West Bank and 500 persons from the Gaza Strip. The sample was drawn randomly and the margin of error is about  $\pm 3\%$ ; still 2.3% of the members of the sample refused to answer the questionnaire.
